Hi, Ben

     I set the continuation run as follows:
      START = 80,0,0
      STOP = 90,0,0
       STEP = 60
; Primary History parameters:
  HIST = 1,0,0
  OUTPUT = 'tiegcm_dynamotest_001.nc','by'
          'tiegcm_dynamotest_002.nc',
 MXHIST_PRIM = 10

     There was not output named as tiegcm_dynamotest_002.nc. In tiegcm_dynamotest_001.nc file, it stopped
at 89, 0, 0. Do you know why?

Best
